

“Tour” Radios Available Through CMCS

The “business” UHF radios that the Club uses to coordinate tours are available for purchase from CMCS. This is a Club courtesy/benefit to make it easier for you to join in the communications during the Club caravans and tours.

They are passed to you directly at CMCS cost, which is a significant discount from retail. The “standard model” we stock is the **Motorola RDU2080d**, a 2-watt 8-channel unit that has a MSRP of \$291. Club cost is **\$222.19**.

We also set them up for CMCS operations by charging the batteries and programming

Frequency **467.9000 Mhz** (Code 7 for this unit) & Interference (Scramble) Freq. **179.9 Hz** (Code 29 for this unit).

These are UHF frequency radios.

“Family” VHF radios will not work.

You may purchase these radios at CMCS General Meetings or by contacting the Club “radio man” Al Dager: Al@CorvetteMarqueClub.com.

NOTE: These are commercial/professional quality units, not toys.

You may also choose a different brand or model radio by visiting www.techwholesale.com or another source of your choice.

For example, the RDU2020 model is a 2-channel unit without a display (uses a knob for channel selection) that sells for \$189.16 at TechWholesale. Other brands and models are also compatible.

Be sure that your purchase is UHF, not VHF. We suggest a 2-watt unit. One-watt units are a little weak, and more than 2-watts requires a FCC license and are usually more expensive. Make sure that your unit can be programmed for the frequency and interference frequency listed above.
