

Tour Radios Available Through CMCS

The “business” UHF radios that the Club uses to coordinate tours are available for purchase from CMCS. This is a Club courtesy/benefit to make it easier for you to join in the communications during the Club caravans and tours.

They are passed to you directly at CMCS cost, which is a significant discount from retail. The “standard model” we stock is the **Motorola RDU2080d**, a 2-watt 8-channel unit for **\$204**.

We also set them up for CMCS operations by charging the batteries and programming

Frequency **467.9000 Mhz** &
Interference Frequency **179.9 Hz**.

These are UHF frequency radios.

“Family” VHF radios will not work.

You may purchase these radios at CMCS General Meetings or by contacting the Club “radio man” Steve Yabroff: Steve@CorvetteMarqueClub.com.

NOTE: These are commercial/professional quality units, not toys.

You may also choose a different brand or model radio. Be sure that your purchase is UHF, not VHF. We suggest a 2-watt unit.

One-watt units are a little weak, and more than 2-watts requires a FCC license and are usually more expensive. Make sure that your unit can be programmed for the frequency and interference frequency listed above.
