

CORVETTES ON THE COLUMBIA UPDATE - March 16th

Hello Everyone –

With all the News & Social Media Hype and concerns both valid and invalid we felt it timely for us to share our thoughts and plans for this years Corvettes on the Columbia Event.

June 5-6 is still several months out, and our plans are to move forward. Our Planning Committee work continues with the same goal in mind – bringing you a great, quality Corvette event. Yes, we are cognizant of what has been happening and share in everyone's concerns. We also are in agreement with many that health activity practices; consumer awareness, and the fine work being done by science and the medical community there will be noticeable control of this new flu virus soon. Science also has now stated that the Virus does not like heat, and we are headed into the summer months, that can be good news for everyone.

We will be closely watching the developments of this flu virus, and the rules from Federal and State governments that may come along with it. At this time, closures and restrictions of activities are in effect til late April. The officials we have spoken to are also hopeful of breakthroughs, seasonal change and citizen health and hygiene awareness to bring about the slowdown and control.

We have met with every vendor, every supplier, and every facility.....and all are putting more emphasis on cleanliness, and reviewing each industries new guidelines. But as we know, everyone has to do their part also.

In the event that restrictions and regulations stay in effect – we will follow those rules. If the decision to cancel or reschedule has to be made, it will be made no later than May15th.

Full refunds will be distributed if necessary.

But our position at this time is to move forward and plan a great weekend for you! We are thinking positive, and staying strong like the Corvette.

I have Event updates coming out soon, and will be sending that shortly.
